March 31, 2026

Detect attorney file theft in under 3 seconds.

When a departing attorney exports client files across commercial litigation, energy, or entertainment matters — forwarding to personal email, uploading to cloud storage — we catch the full exfiltration chain before anyone knows it's happening. 100% on-premise. Zero data egress. Litigation-ready evidence.

THE PROBLEM

$8M	77d	97%	<3s
Average portable client book at risk	Average time to detect insider theft	DLP false positive rate	EchoWorks detection time

WHAT WE DETECT

`matter_access → bulk_export → email_forward → cloud_upload`

Real-time correlation across iManage/NetDocuments, email gateway, and cloud proxy. The full departure-theft chain detected and contained automatically.

Sub-3-Second Detection

Pure pattern matching. No LLM latency. 117+ behavioral patterns. Detect the chain as it unfolds.

100% On-Premise

Runs on your hardware. No client data, no PII, no matter files ever leave your network.

Litigation-Ready

CFAA, DTSA, trade secret evidence. Chain of custody preserved. PDF + JSONL audit trail.

DEPLOYMENT

Deployed in 48 Hours. No IT Overhaul.

01

Connect

Read-only integration with DMS, email, cloud proxy

02

Baseline

Learn normal access patterns for every attorney in 48 hours

03

Detect

Real-time chain correlation when patterns deviate

04

Contain

Auto containment: revoke sessions, quarantine evidence, alert

PRICING

$5,000

per month retainer

- ✓ Full exfiltration chain detection
- ✓ 117+ behavioral pattern library
- ✓ NIST 800-61 incident response
- ✓ Litigation-ready audit trails
- ✓ Monthly pattern updates
- ✓ 100% on-premise deployment

If we don't detect a real threat pattern in 90 days, you don't pay.
